

Broadway Avenue  
Bridge Replacement

# Welcome Thank you for attending

## At today's workshop, ITD will:

- Provide a project update.
- Present outcomes of Workshop #2.
- Gather input on further developed design elements.
- Discuss next steps.

ITD will use comments gathered from the community design workshop series to develop a range of design options for the project.

The design options will be presented to the greater community during a public open house later this year.
